CARRER OBJECTIVE

Motivated and detail-oriented Computer Science graduate with strong knowledge in Java, Object-Oriented Programming, Data Structures, and Algorithms. Seeking a Java Developer role to apply problem-solving skills, contribute to real-time projects, and grow in software development.

EDUCATION

B.E (HONS)-COMPUTER SCIENCE AND ENGINEERING (2021 -2025) CGPA - 8.9

Theni Kammavar Sangam College Of Technology

HSC (2020 - 2021) PERCENTAGE - 91.5

K V A Girls Higher Secondary School

SSLC (2018 - 2019) PERCENTAGE 89.8

K V A Girls Higher Secondary School

TECHNICAL SKILLS

- **Programming Languages:** Java
- **Database Management:** SQL
- **Version Control:** Git, GitHub
- **Software Development Concepts:** OOPs, Basic Data Structures & Algorithms
- **Other Skills:** Agile methodology, SDLC knowledge

CERTIFICATIONS

Java fullstack development- QSPIDERS

ACADEMIC PROJECTS

Credit Card Fraud Detection System (Java, Machine Learning)

- Developed a Java-based application using machine learning algorithms to detect fraudulent credit card transactions in real time.
- Improved detection accuracy and reduced false positives using classification models.
- Implemented database connectivity with MySQL to store and analyze transactions.

Web Scraping With BeautifulSoup Using Sentiment Analysis and Realtime Alert System

- Built a web scraper using BeautifulSoup to extract live data from social media platforms.
- Implemented sentiment analysis to classify data into positive, negative, and neutral categories.
- Developed a real-time alert system that triggers dashboard notifications when negative sentiment exceeds a set threshold.
